

Grameenphone m2m Control Center

Simplify and automate your M2M solution

GP M2M Control Center

Grameenphone's M2M Control Centre service is a sophisticated cloud-based platform that gives you the complete visibility over your GP-enabled M2M connections.

Figure-1: Login Page of M2M Control Center

The M2M Control Centre has a range of features to simplify and automate your M2M solution. The platform offers a suite of self-service tools, such as device information, SIM status, usage control and many more, which can help you to drive efficiency, deploy faster and improve the profitability of business.
