

# Grameenphone m2m Plan

The Best Connectivity Options for Your M2M Solution

## What is M2M?

Machine to Machine (M2M) communications is the automatic or periodic exchange of data between two or more machines over a wireless network.

Today, M2M is enabling transformation across all industries as businesses take advantage of the reach of mobile technology to remotely communicate with assets and devices in the field; thus, improving asset utilization, reducing costs, enhancing customer experience and enabling faster decision making.

### Our M2M Plans provide you with a suite of enablers to support your M2M solution:

- **Network access:** Enjoy the superior coverage of our 2G and 3G networks, country's largest and most reliable telecommunications network.
- **Data plans:** A range of data plans to suit your needs, with options for dedicated Access Point Name (APN) for security, reliability and speed.
- **SIM cards:** Industrial-grade M2M SIM cards to withstand extreme environmental conditions for demanding M2M applications.
- **Control Center:** Use our cloud-based M2M Control Centre portal to manage your M2M SIMs and Data Plans with ease and control.
- **Advanced VPN:** Protect your data transmissions with a virtualPrivate Network (VPN) over the local internet or an end-to-end private network.

## Our M2M Plans

We offer two types of M2M Plans – Standard and Advanced. The Standard M2M Plan comes with standard M2M connectivity options, while the Advanced M2M Plan comes with dedicated APN and VPN connectivity options. Details of the plan options are listed below.

Standard M2M	Advanced M2M
M2M Volume Packs	M2M Volume Packs
M2M Control Center	M2M Control Center
Shared APN	Dedicated APN
Fixed IP	Fixed IP
	M2M SIM Cards
	VPN Connectivity*

\* Options available for Best Effort VPN over local Internet or business grade VPN over an end-to-end private network.

We also offer a range of volume packs under the above plans. Below is a table to help you select the most appropriate plan for your M2M data usage needs.

Usage Type	Standard M2M	Advanced M2M
Low	20, 50, 100 MB	100 MB
Medium	1, 2 GB	1 GB
High	5, 10 GB	Unlimited
